TECHNOLOGY BRIEF · INTERNET & PHONES

Business NBN & Cloud Phones

internet and a fully managed phone system, on the same bill as your IT

Short answer: whedo.it supplies business NBN with a static IP and a fully managed cloud phone system alongside your IT. One provider for the computers, the internet and the phones means one bill, one number to call and no finger-pointing between suppliers when something stops working.

Why businesses bring it together

- **One bill, one call.** Internet, phones and IT support from the same team.
- **Phones that follow people.** The same number rings on the desk phone, the laptop and the mobile app.
- **No phone system box in the office.** The phone system runs in the cloud, so adds and changes are a call to us.
- **Built for regional sites.** We already run phones and internet for a 30-site regional network.

What's included

Plan	Includes	Price
Voice Duo	2 users, 2 phone numbers, unlimited Australian calls	$59/mo
Voice Team	6 users, 3 phone numbers, unlimited Australian calls	$149/mo
Office Connect	Business NBN 500/50 with static IP plus Voice Duo	$159/mo
Business NBN 500/50	Static IP included, month to month	from $109/mo
Extra user or number	Add a user (unlimited calls) or another phone number	$25 / $5 per mo

Prices in AUD, excluding GST, as published by whedo.it in November 2026. Month to month, no lock-in. Final quote depends on address, users and hardware.
