TECHNOLOGY BRIEF · DEVICE MANAGEMENT

Microsoft Intune

every laptop and phone enrolled, compliant, up to date and wipeable if lost

Short answer: Microsoft Intune is Microsoft's cloud service for enrolling, configuring, securing and updating devices, and for deploying and protecting apps. It's included in Microsoft 365 Business Premium. whedo.it uses it to put every device on one standard build, check that each device stays compliant, and wipe company data from a lost device.

Why businesses use it

- **One standard, every device.** Settings, apps and updates applied the same way to every laptop, in the office or out of it.
- **New laptops set up without a technician.** Windows Autopilot enrols a new device straight into management.
- **Lost or stolen devices.** A company device can be wiped; on a personal phone, only the organisation's data is removed.
- **Access depends on health.** Intune reports each device's compliance to Entra ID, and Conditional Access can block devices that don't meet the standard.

What whedo.it does

Area	What we do
Standard build	One whedo.it baseline for Windows devices, with a current Windows 11 release as the minimum, varied per client only where needed.
Compliance	Compliance policies on every managed device, with Conditional Access requiring a compliant device so the standard has teeth.
Security	Security baselines, attack surface reduction rules, BitLocker encryption, Defender for Business and update rings.
Lockdown	Policies such as USB storage lockdown applied centrally across every managed device.

Area	What we do
Reporting	A nightly baseline scorecard in your whedo.it support portal: how many devices are at standard, and what's being fixed.
Remediation	Scripted fixes pushed remotely to bring devices back to standard, without a site visit.

Key facts

Fact	Detail
Platforms	Windows, macOS, iOS/iPadOS, Android, Linux, tvOS and visionOS.
Enrolment	Windows Autopilot, Apple Automated Device Enrollment or Android Enterprise.
Personal devices	App protection policies protect data inside Outlook, Teams and other managed apps, and can selectively wipe organisation data without touching personal content.
Licence	Microsoft Intune Plan 1 is included in Microsoft 365 Business Premium.

Who it suits: any business with laptops or phones that leave the office, staff using their own phones for work email, or several sites that need to be run the same way.

Next step

Book a 30-minute scoping call. We'll show you how many of your devices meet the standard today. Warren Ephron · 0421 346 887 · warren@whedoit.com
